

LCD Blocker

Large LCD Colour Screen

The PB-88 is lens blocker to be used with the ST 88 Satellite Tracer and the F-8 Premier patternless edger. It offers a large Colour LCD Screen which is an exact replication of the F-8 screen. All parameters that are used for processing a lens (i.e. lens material, finishing method, centring and blocking data) can be introduced via the soft keys located in front of the blocker.

Robustness

The PB-88 has been designed to be used in high output environment. Its mechanic is extremely robust and accurate and will allow precise and repeatable blocking of the lens for a long period without maintenance.

Visslo : Performance, simplicity and reliability

Technical features

Power supply	AC 100V-240V 50/60Hz
Power consumption	0,2 KVA
Dimension / Weight	240(W) X 300(D) X 200(H), 10 Kg
Standard accessories	Null Modem Cable Screen Plastic Protector Power Supply Cord
